

Installation

LGA 1366 Standard Cooler

Installation Process

- ① Position heat sink over the processor. Align fasteners with motherboard hole pattern (see Figure 1).
- ② Thumb pressure to the top of each of the 4 fastener caps (see Figure 2). You will hear an audible "click" upon full engagement.
- ③ Make sure all the fasteners are fully engaged. Installation is now complete (see Figure 3).

Remove Process

- ① Turn the cap counter-clockwise to the finish position. (See the Figure 4.)
- ② Pull up the Cap, thus releasing the fastener from the motherboard. Repeat this step for each fastener. (See the Figure 4.)
